

POOLCASH

What is POOL Cash?

An innovative platform that enables automated creation of USDT liquidity pools.

Partnership with Uniswap:

All liquidity is created on the world's largest DEX, ensuring high liquidity and security.

It offers automatic rewards and self-custody, allowing users to monitor their liquidity in real time.

How does Pool creation work?

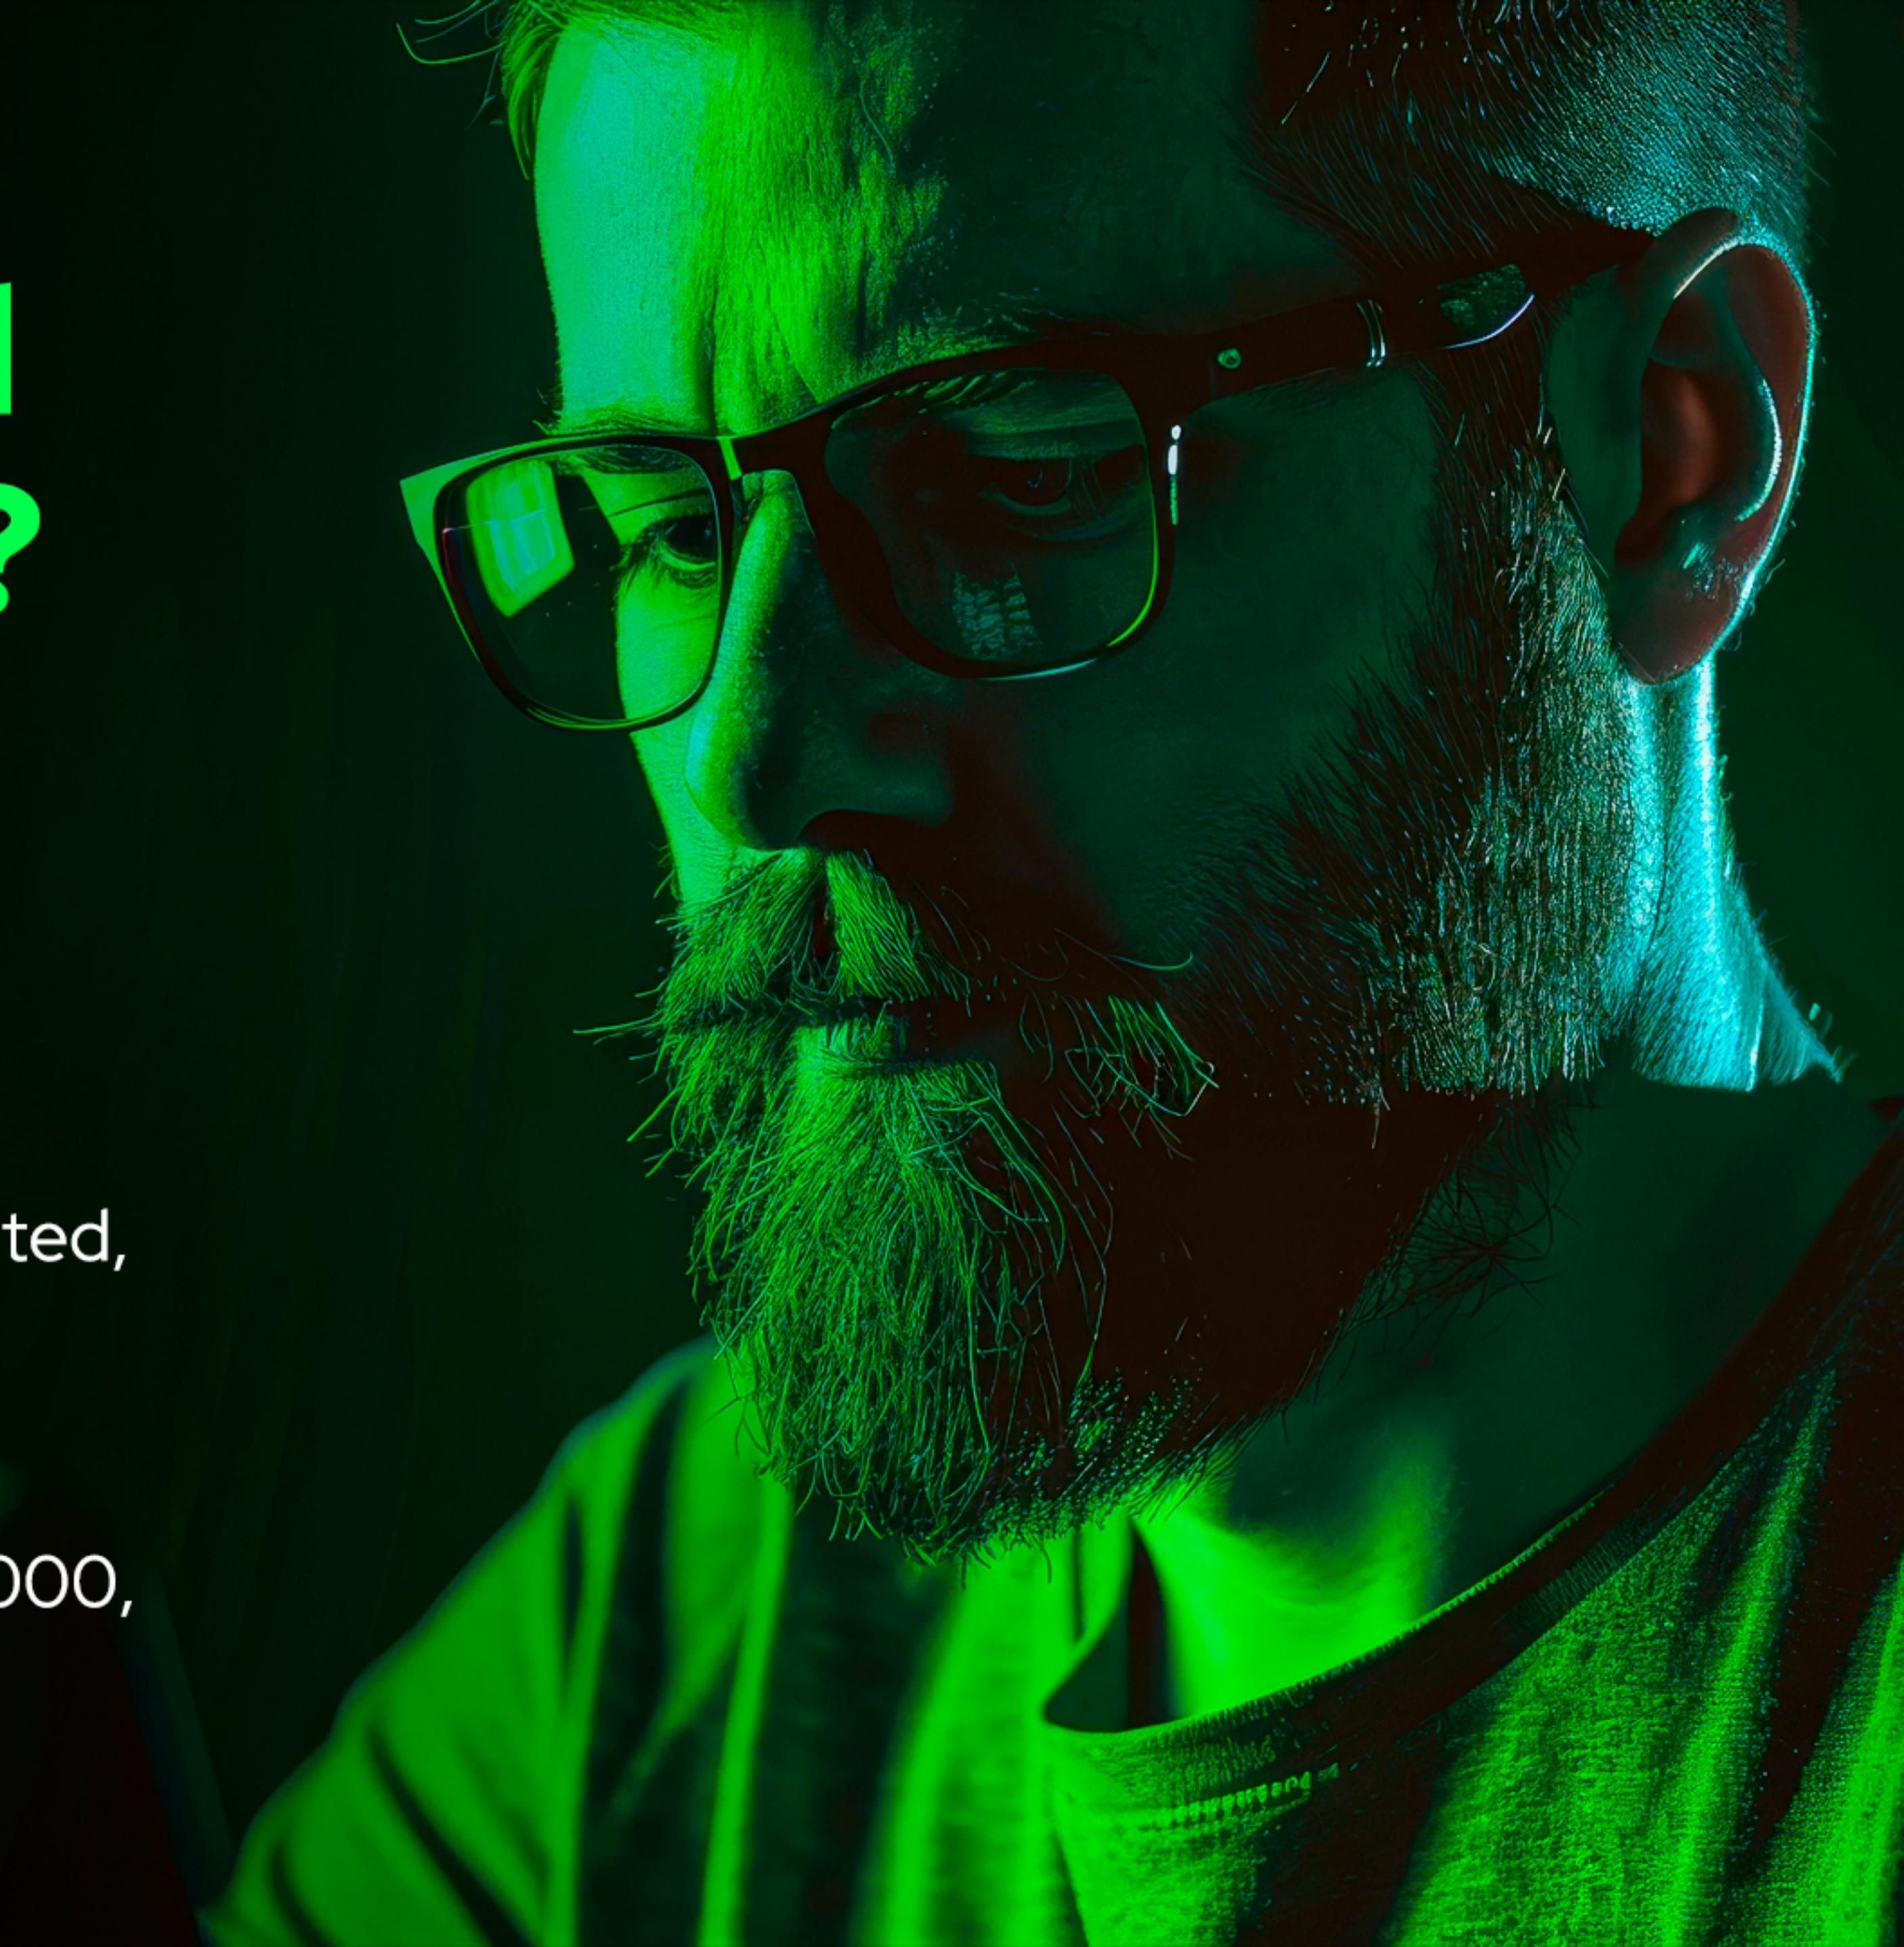

Minimum Values:

Pools can be created with multiples of \$10 in USDT on the Polygon network.

Automatic Profit:

Whenever an MPool purchase is generated, the tokens are automatically positioned in liquidity with an average profit of 7%.

Example: If a position is created with \$1000, the tokens will be sold for \$1070.

MPOOL - Decentralized Token

Protocol: One of the largest on the Polygon network

Deflation: Supply reduction through burn

Liquidity: Pool locked for 999 years (managed by UNCX)

Supply: 100% in circulation

Protection: Anti-whale mechanisms

Liquidity: Largest pool creation system on the market

Trend: Stable chart with upward movement

Profit: Profit realization through community selling

Contract: 0x2d34a748427801e5d3da862bf474e2b28e501624

Options to Remove Liquidity

ORANGE BUTTON

BACK OFFICE

Allows liquidity to be removed at any time.

If liquidity is at **100%**, the MPool will be automatically sent to the user's wallet.

GREEN BUTTON

CLAIM

Available when the liquidity pool is **100% in USDT**.

The principal amount will be sent to the user's wallet along with **50% of the profit**.

The remaining **50% is sent** to the network bonus, following the bonus rules.

BLUE BUTTON

REINVESTMENT

Activated when liquidity is **100% in USDT**.

100% of the principal goes to the market to buy MPool.

75% of the profit is used to buy MPool, creating a new position with a **7% gain**.

The **remaining 25% of the profit** goes to the network bonus, following the same claim rules.

Level Structure

PROFIT DISTRIBUTION

1ST LEVEL

30% **\$10**

Requires an active pool of at least \$10

2ND LEVEL

15% **\$20**

Requires an active pool of at least \$20 and 2 direct referrals of \$10

3RD LEVEL

7% **\$30**

Requires an active pool of at least \$30 and 3 direct referrals of \$10

4TH LEVEL

7% **\$40**

Requires an active pool of at least \$40 and 3 direct referrals of \$10

5TH LEVEL

7% **\$50**

Requires an active pool of at least \$50 and 3 direct referrals of \$10

6TH LEVEL

7% **\$60**

Requires an active pool of at least \$60 and 5 direct referrals of \$10

7TH LEVEL

7% **\$70**

Requires an active pool of at least \$70 and 5 direct referrals of \$10

8TH LEVEL

5% **\$80**

Requires an active pool of at least \$80 and 5 direct referrals of \$10

9TH LEVEL

5% **\$90**

Requires an active pool of at least \$90 and 5 direct referrals of \$10

10TH LEVEL

5% **\$100**

Requires an active pool of at least \$100 and 5 direct referrals of \$10

11TH LEVEL

1% **\$110**

Requires an active pool of at least \$110 and 7 direct referrals of \$10

12TH LEVEL

1% **\$120**

Requires an active pool of at least \$120 and 7 direct referrals of \$10

13TH LEVEL

1% **\$130**

Requires an active pool of at least \$130 and 7 direct referrals of \$10

14TH LEVEL

1% **\$140**

Requires an active pool of at least \$140 and 7 direct referrals of \$10

15TH LEVEL

1% **\$150**

Requires an active pool of at least \$150 and 7 direct referrals of \$10

Rules to maintain activity

To unlock levels, users must maintain an active pool with the minimum required value.

Users must follow the referral line rules, having the required number of active direct referrals.

To remain active, the user must have a pool above \$100 in the back office (active in the market).

If the pool is removed and there is no active position above \$100, the user becomes inactive for bonuses.

All direct referrals must be active for the user to count the corresponding levels.

The role of liquidity

Liquidity is essential for efficient cryptocurrency transactions.

In September 2023, the average daily trading volume was around **\$60 billion**, with continuous growth in decentralized exchanges.

Growth of Liquidity Pools

Liquidity pools allow users to provide liquidity in exchange for rewards, playing a vital role in DEX operation.

Uniswap, one of the largest DEXs, recorded a TVL of approximately **\$4 billion** in 2023.

Credibility and Security

Creating liquidity on Uniswap provides high liquidity and security, strengthening user trust.

Users can transact efficiently with continuous access to their liquidity.

Why Choose POOL Cash?

Simplified and automated liquidity pool creation

Self-custody and full control of assets

Consistent profit opportunities and access to one of the largest DEXs in the world
